PERMANENT MAKEUP – MICROPIGMENTATION

*Please note that a consultation & patch test is required prior to having this treatment.

Permanent make-up also known as micro-pigmentation follows the principles of traditional tattooing, in that pigment, in the form of natural iron oxide, is applied to the dermal layer of the skin, in the desired colour of your choice.

With permanent make-up, you eliminate the chore of having to apply, re-apply and remove make-up every day. Imagine the possibilities, wake up looking good, step out of the shower, the pool or gym, confident that your eyebrows, eye-liner and lip line are perfectly in place.
